ARTIFICIAL INTELLIGENCE | 2023 –
PRESENT**

UNIVERSITY OF ENGINEERING & TECHNOLOGY
(UET), MARDAN, PAKISTAN

ABOUT ME

Creative and detail-oriented Graphic Designer currently pursuing a BS in Computer Science / AI at UET Mardan. I bridge the gap between visual communication and technical implementation, combining a strong foundation in digital design with growing expertise in software development using Python, Flutter, and MySQL.

PROJECTS & EXPERIENCE

Software Development Projects

- Cross-Platform Application (Flutter & MySQL): Currently developing a mobile application utilizing Flutter for a responsive UI and MySQL for robust back-end data management.
- Data Automation Scripting (Python): Building Python-based tools to automate repetitive tasks and streamline data processing workflows.

Design Experience

- Landing Page Design: Designed clean, conversion-focused landing pages using Framer and Canva, prioritizing layout hierarchy, typography, and visual flow.
- Presentation Design: Created polished, professional slide decks in PowerPoint and Canva for academic and personal projects, focusing on brand aesthetics and clarity.
- Social Media Graphics: Produced eye-catching social media content, including posts, stories, and banners tailored to specific platform dimensions and audience engagement.
